Here’s the resume in text format:

---

Devin Edwards
AI Engineer | Cybersecurity | BCI Researcher
Austin, TX | sycorax89@tutanota.com | 18157939378
Portfolio: www.devinedwards.info | Project: www.superpoweredfitness.fit

---

## 🔷 Objective

Innovative AI engineer and cybersecurity specialist with expertise in neural networks, brain-computer interfaces (BCIs), and high-performance computing. Passionate about building intelligent systems that push human potential, automate workflows, and enhance security. Seeking to drive cutting-edge AI applications in deep tech, cybersecurity, and advanced robotics.

---

## 🔷 Core Competencies & Technical Skills

✔ AI & ML Development: LLM training, CUDA, ROS2, diffusion models, Docker, prompt engineering
✔ Programming: Python, C, C++, Rust, Node.js, JavaScript, React, API integrations
✔ Cybersecurity & Systems: OSINT, penetration testing, network security, BCI innovation
✔ Software Architecture: Assembly, high-precision workflows, API development, full-stack engineering
✔ Robotics & Embedded Systems: AI vision prototypes, edge computing, automation systems

---

## 🔷 Experience

Founder & Lead Engineer
Super Powered Designs, LLC | 2022 – Present
🚀 Built AI-powered fitness solutions & cybersecurity tools to optimize human performance
🚀 Designed and deployed scalable APIs integrating diffusion models for AI automation
🚀 Engineered front-end & back-end architectures for high-performance e-commerce & data-driven applications

AI & Cybersecurity Engineer (Freelance/Independent)
2020 – Present

🔷 Trained & deployed custom AI models, agents, and LLM-based applications

🔷 Developed BCI-powered neural network systems to enhance cognition & learning

🔷 Conducted penetration testing & OSINT research to analyze vulnerabilities in high-risk environments

🔷 Built real-time automation tools & AI vision prototypes for robotics and machine learning

---

🔷 Projects

Super Powered Fitness

⚡ AI-driven biometric tracking & optimization platform for human performance

⚡ Built smart automation tools & machine learning enhancements for wellness applications

G.R.I.D. (Global Reconnaissance & Intelligence Deployment)

🔍 Cybersecurity & OSINT automation framework

🔍 Designed for penetration testing, data retrieval, and deep AI threat analysis

AI Vision Systems & BCI Prototypes

🧠 Developed brain-computer interfaces (BCI) for adaptive learning & cognitive enhancement

🧠 Engineered diffusion-based vision systems for AI-powered robotics & automation

---

🔷 Education & Certifications

🎓 Self-Taught & Research-Based Learning – Specialized in AI, Cybersecurity, & BCI Research

📜 AI & Machine Learning Specialization – Coursera

📜 ROS2 Development Certification

---
